New for our MedTech Integrates 2021 event

Be part of the new Digital Innovation Village at MedTech Integrates 2021

This year, high-quality poster presentations will be an important element of MedTech Integrates 2021. We would therefore like to solicit posters that present recent and late-breaking research on topics relevant to the MedTech Community, to be displayed in our new Innovation Village. This is a *very limited opportunity*, so don't miss out.

Broadcast live on **22 June**, MedTech Integrates creates opportunities for making new connections and provides attendees with significant opportunities to learn from and interact with our growing community.

The poster opportunity is offered free of charge to the first 15 confirmed bookings and includes:

- One **delegate pass** to attend the event (additional passes available for £45 + VAT).
- A **video** to describe your poster (in MP4 format). Maximum length is 2 minutes, **or**
- A **PowerPoint slide deck** saved in MP4 format. Maximum length for the slide deck MP4 is also 2 minutes
- **Associated collateral** in jpeg, PDF or PowerPoint format (maximum 3). These can be downloaded by interested parties and should therefore contain your contact details.
- **Your bio** (no longer than 150 words), which should also include your Poster Title and include a brief synopsis of your poster.

Please note you will need to supply the above information to us. We are unable to help with the content creation for your poster submission.

Through your posters, you will have the opportunity to share your findings with senior executives from other MedTech and Diagnostic developers and manufacturers, Pharma organisations, investors, regulators, supply chain solution providers, clinicians and academics and patient groups. We expect over 400 delegates to attend the event.

The posters will be available on our event platform for attendees to view 1 week prior to the event start, on the day of the event and for approx. 2 weeks after the event. During this time delegates can connect with you via the platform's in-built chat message and video calling functions.

Social media content in the run up to the event will promote the Innovation Village.

The deadline for requesting a poster at MedTech Integrates 2021 and submitting your information is Friday 4th June. All collateral must be uploaded to the platform by Monday 14th June.

To register your interest to take part please email karen.chapple@lsi-uk.com
